# RUBBER BAND BINDING MACHINE FOR FLOWER

## PRODUCT FEATURES

- Possible to bundle for different product sizes or shapes using rubber band.
- There are no shaking or disorder after binding the products.
- Flywheel reverse type so, very less noise and can be exact position binding, there are no disperse and no tie knot out after binding.
- This product can be unlock the knot by hand after binding and easy to work to go into the next step in the processing, and an effective in increasing and improve work efficiency.
- This product is composed by a highly developed knowledge mechanical parts with skills in precision machining, Designed any binding work environment to give satisfy to the job.

## APPLICATION

- Flower : Rose, Chrysanthemums, Lilies, gypsophila, Tulip, etc.
- Agricultural product
- Industrial applications : Wires, Wire ties, Gloves, Ball-point pen, house wire creep, etc.
- Use range :  $\phi 10 \sim \phi 120 \text{mm}$  is possible to easy to binding.

## THEHNICAL DATA

- Power Supplying : 200~220V / 50~60Hz
- Size : 450x350x520mmH
- Weight : 36kg
- Speed : Max 1/60
